AIM-9M SIDEWINDER MISSILE SYSTEM

EXECUTIVE SUMMARY

The AIM-9 series Sidewinder Missile is a short-range, air-to-air missile whose mission is to detect, home-in, intercept, and destroy enemy aircraft. The AIM-9L missile evolved because of a combined Navy and Air Force effort to develop an air-to-air missile with a greater tracking rate and tighter turn capability than earlier series missiles. The missile featured an improved target detector that enhanced its effectiveness in short range combat scenarios.

The AIM-9M missile evolution has been driven by the AIM-9L Product Improvement Program (PIP) and developed into full-scale development, test, and evaluation program during FY78/79. The first AIM-9M variant, the AIM-9M-1, was fielded in FY 82. The Guidance Control Section (GCS) is the only component unique to the AIM-9M, which, prior to the AIM-9M-8, has three Navy variants: AIM-9M-1 or AIM-9M-3 (both use the same GCS), AIM-9M-4, and AIM-9M-6. The AIM-9M-8 contains the latest GCS variant which improves Navy warfighting capability over earlier AIM-9M variants to counter infrared (IR) countermeasures (CM) from aerial threats. The first AIM-9M-8 was fielded in FY 95.

The AIM-9M-8 upgrade affects only the AIM-9M GCS through the replacement of five circuit cards and the associated parentboard. Based on the nature of this change, there is no impact to organizational or intermediate level maintenance with regard to manpower level, personnel skills, or training. All-Up-Round (AUR) depot level maintenance is not impacted with regard to manpower level or personnel skills, but is impacted with regard to training by the associated test set upgrade, the AN/DSM-152B. The AN/DSM-152 Operation and Maintenance course has been updated to reflect the AN/DSM-152B. Aircrrew and operators are not impacted with regard to manpower level or personnel skills, but are impacted with regard to training by the additional missile status tones. The Naval Air Warfare Center, Weapons Division (NAWCWD) China Lake, developed a familiarization video to introduce the new capability to squadrons, and PMA205 and TOPGUN are developing Interactive Courseware (ICW) to support missile status tone training.

The improved AIM-9M-8 Sidewinder will not alter the manning requirements at organizational, intermediate, or Weapon Stations maintenance activities. Existing skills are adequate to maintain the AIM-9M-8. No new Navy Enlisted Classifications (NEC) or Marine Corps Military Occupational Specialties (MOS) will be needed to support the AIM-9M-8. There is no manpower impact related to AIM-9M-8.

**AIM-9M SIDEWINDER MISSILE SYSTEM**

**INTRODUCTION**

This Navy Training Plan (NTP) was developed to update the previous version of AIM-9 Sidewinder Missile System NTP, A-50-8105A dated 9 Nov 89, and to identify the lifecycle Manpower, Personnel, and Training (MPT) requirements associated with the AIM-9 Sidewinder Missile System. This edition identifies the training impacts caused by the modification of the AIM-9M to the AIM-9M-8.

Information was obtained as a result of fleet comments received in July 1995 that have been incorporated into this document.

#### LIST OF ACRONYMS

ACNO	Assistant Chief Of Naval Operations
AIMD	Aviation Intermediate Maintenance Department
AO	Aviation Ordnanceman
AT	Aviation Electronics Technician
AUR	All-Up-Round
BCM	Beyond the Capability of Maintenance
BUPERS	Bureau of Personnel
CATM	Captive Air Training Missile
CCM	Counter-countermeasures
CEST	Classroom EOD System Trainer
CNO	Chief of Naval Operations
CV	Aircraft Carrier
CVN	Aircraft Carrier, Nuclear
DATM	Dummy Air Training Missile
DMSO	Director, Major Staff Office
DRP	Designated Repair Point
EOD	Explosive Ordnance Disposal
EODTEU	Explosive Ordnance Disposal Technical Evaluation Unit
ETS	Engineering and Technical Services
FMS	Foreign Military Sales
FREST	Fleet Replacement Enlisted Skills Training
FRS	Fleet Readiness Squadron
FY	Fiscal Year
GCS	Guidance Control Section
ICW	Interactive Courseware
ILSP	Integrated Logistics Support Plan
IR	Infrared
IRCM	Infrared Countermeasures
IUT	Instructor Under Training
MALS	Marine Aviation Logistics Squadron
MATMEP	Maintenance Aviation Training Management and Evaluation Program
MCAF	Marine Corps Air Facility
MCAS	Marine Corps Air Station
MOS	Military Occupational Specialty
MTIP	Maintenance Training Improvement Program
MTU	Maintenance Training Unit
NAMTG	Naval Air Maintenance Training Group
NAS	Naval Air Station
NATM	Special Test Air Training Missile

**LIST OF ACRONYMS (Continued)**

NAVAIRSYSCOM	Naval Air Systems Command
NAVSCOLEOD	Navy Explosive Ordnance Disposal School
NAVWPNSUPPCEN	Naval Weapons Support Center
NAWCWD	Naval Air Warfare Center Weapons Division
NAWCWPNS	Naval Air Warfare Weapons Center
NAWMP	Naval Airborne Weapons Maintenance Program
NAWMU	Naval Airborne Weapons Maintenance Unit
NEC	Navy Enlisted Classification
NFO	Navy Flight Officer
NSAWC	Naval Strike Air Warfare Center
NSWC-IH	Naval Surface Warfare Center - Indian Head
NOBC	Navy Officer Billet Code
NTP	Navy Training Plan
NWS	Naval Weapons Station
OJT	On the Job Training
PDA	Principal Development Activity
PEST	Practical EOD Systems Trainer
PIP	Product Improvement Program
PMA	Program Manager, Air
S-A	Safety-Arming
SELRES	Selected Reserves
SFTI	Strike Fighter Tactics Instructor
SFTS	Strike Fighter Training System
SFWSL	Strike Fighter Weapons School Atlantic
SFWSP	Strike Fighter Weapons School Pacific
SFWT	Strike Fighter Weapons and Tactics
TA	Training Agent
TBD	To Be Determined
TD	Training Device
TTE	Technical Training Equipment
TSA	Training Support Agent
USAF	United States Air Force
USN	United States Navy
USMC	United States Marine Corps

**PART I - TECHNICAL PROGRAM DATA**

**NTP Number: A-50-8105B/A  
Date: January 1997**

**A. TITLE-NOMENCLATURE-PROGRAM**

1. **Title-Nomenclature-Acronym.** AIM-9M Sidewinder Missile System.
2. **Program Element.** 64354N.

**B. SECURITY CLASSIFICATION.** Security documents are developed in accordance with OPNAVINST C5513.2B dated 15 October 1992.

1. Missile - Secret
2. Missile Avionics - Secret
3. NTP - Unclassified

**C. NTP PRINCIPALS**

1. Assistant Chief of Naval Operations (ACNO) /  
Director Major Staff Office (DMSO) Program  
Sponsor ..... CNO (N88)
2. ACNO/DMSO Resource Sponsor ..... CNO (N88OC)
3. Principal Development Activity (PDA) ..... NAVAIRSYSCOM (PMA259)
4. Training Agents (TA) ..... CINCLANTFLT  
CINCPACFLT  
CNET (T4525)  
MCCDC
5. Training Support Agent (TSA) ..... NAVAIRSYSCOM (PMA205-5)
6. Manpower and Personnel (M&P) Mission  
Sponsor ..... CNO (N1)
7. Director of Naval Training ..... CNO (N7)
8. Bureau of Naval Personnel (BUPERS) ..... BUPERS (PERS-4,  
PERS-40)
9. Commandant of the Marine Corps  
Manpower Management (CMC MM) ..... CMC (ASM)

**D. OPERATIONAL USES**

**1. Purpose.** The AIM-9 series Sidewinder Missile is a short-range air-to-air missile. The missile is used to track, home-in on, intercept, and destroy enemy aircraft.

The AIM-9M-8/9 upgrade retrofits Sidewinder Missiles from the AIM-9M-1/3/4/6 to the AIM-9M-8 configuration for the Navy and the AIM-9M-9 for the United States Air Force (USAF). For the purpose of this Navy Training Plan (NTP), only the AIM-9M-8 is addressed. The change incorporates electronics processing modifications to improve the tracking capabilities against modern infrared Countermeasures (IRCM).

**2. Foreign Military Sales (FMS) and Other Source Procurement.** The AIM-9M-8/9 is approved for FMS to Britain, Canada, and Australia. For detailed FMS information, contact PMA259.

**E. TECHNICAL/OPERATIONAL EVALUATION (TECHEVAL/OPEVAL).** Developmental testing for the AIM-9M-8 was conducted during third quarter FY91 by Naval Air Warfare Center, Weapons Division, Point Mugu (NAWCWD PM). Operational testing for the AIM-9M-8 began in the fourth quarter FY92 and was decertified in the first quarter of FY93. An operational test and readiness review was conducted in the second quarter of FY93, and operational testing resumed in the third quarter of FY93. The Operational assessment (OT-IIA) was conducted by VX-4. Operational evaluation (OT-IIB) was conducted by VX-5.

**F. EQUIPMENT/SYSTEM/SUBSYSTEM REPLACED.** The AIM-9M-8 modification replaces circuit card assemblies in the electronics assembly of the guidance control section.

**G. DESCRIPTION.** The AIM-9M and the AIM-9M-8 Sidewinder Missiles are similar. The only significant difference between the two missiles is the Guidance Control Section (GCS). The AIM-9M-8 features improved tracking capabilities against modern IRCMs. The AIM-9M-8 modification changes the electronics assembly of the GCS.

**1. Functional Description.** Sidewinder is a supersonic, air-to-air, guided missile that contains an Infrared (IR), passive homing target detector, proportional navigational guidance, and a torque-balance control system. The missile is propelled by a solid-propellant rocket motor. The AIM-9M is configured with an annular blast fragmentation warhead. Aerodynamic lift and stability for the missile are provided by four wings. Rollerons on each wing reduce the roll rate and flutter. Airframe maneuvering is accomplished by four fins mounted in line with and forward of the wings and is activated by the torque-balance servo system. The AIM-9 Sidewinder Missile is comprised of the following components:

**a. Guidance Control Section (GCS).** All AIM-9M GCS are comprised of three major assemblies; a seeker assembly for detecting and tracking the target; an electronics assembly for processing detected target information; and a servo assembly that transforms electrical tracking signals to mechanical movement of the fins. An umbilical cable assembly provides electrical interface between the missile GCS and the aircraft launcher. The umbilical

cable also allows the flow of coolant from the LAU-7 to the missile GCS. AIM-9M GCS versions include the WGU-4A/B used in the AIM-9M-1 and AIM-9M-3, the WGU-4C/B used in the AIM-9M-4, the WGU-4D/B used in the AIM-9M-6, and the WGU-4E/B GCS used in the AIM-9M-8. The WGU-4E/B GCS uses advanced technology that has evolved through the WGU-4D/B development, while expanding the potential of the IRCM detection circuitry and improving the missile's capability with respect to tactical IRCM deployment.

**b. Target Detectors, DSU-15/B, DSU-15A/B, DSU-15B/B.** These target detectors are narrow-beam, active optical-proximity fuze systems designed to detect the presence of a target and initiate warhead detonation. Major components within the target detectors are a transmitter that emits four narrow fan-shaped beams through four lenses, a laser receiver that detects reflected energy, signal processing circuitry to initiate detonation, and a thermal battery to provide internal power after missile launch. All target detectors are interchangeable in the AIM-9M design; however, only the DSU-15B/B and DSU-15/B are compatible with the Special Test Air Training Missile (NATM)-9M-2, NATM-9M-3, and NATM-9M-4 configurations, because they feature a communication tube that allows routing of the telemetry cable assembly.

**c. Safety-Arming (S-A) Device, MK 13 Mod 2.** The S-A device is designed to arm the Sidewinder Missile at a safe distance from the launch aircraft and to detonate the warhead upon command from the Target Detector or GCS. The major components of the S-A device are an interrupted explosive train, an acceleration arming device and associated electrical switches. The S-A device has two windows: the forward window allows viewing of the launch latch to verify proper engagement, while the aft window allows viewing of the SAFE/ARM indicator.

**d. Warhead, WDU-17/B.** The warhead provides the destructive force of the missile. The warhead consists of a case assembly, two booster plates, high explosives, an initiator, and fragmentation rods. Exercise Warheads (smoke/flash) WDU-9A/B, are used in NATMs.

**e. Rocket Motor, Mk 36 Mods 7/8/9/10/11.** The rocket motor provides the propulsion for sustained flight of the missile. The Mk 36 Mods 7 through 11 are solid-propellant, high-thrust rocket motors that comprise the aft end of the AIM-9M.

**f. Wings, Mk 1 Mods 0/1/2.** Four wings, attached to the aft end of the rocket motor, provide aerodynamic lift and stability for the missile during flight. Each wing has a rolleron assembly that is uncaged during free flight to provide roll (rate) stabilization.

**g. Fins, BSU-32/B.** Four fins, attached to the GCS, provide a lift force on the forward airframe proportional to the input signal from the seeker, missile velocity, and altitude. The fins are electrically actuated and pneumatically controlled by a servo system in the aft portion of the GCS.

**2. Physical Description.** The physical and electrical characteristics of the Sidewinder missile are as follows:

Length (AIM-9M).....	113.1 inches
Diameter .....	5.0 inches
Wing Span .....	25.2 inches
Weight (AIM-9M).....	188.2 pounds
Power Requirements (external) .....	115 VAC 400 HZ and 28 VDC

Power Requirements (internal) ..... 27 VDC thermal battery

**3. Introduction.** The AIM-9M-8 missile is being introduced into the Navy inventory through an AIM-9M retrofit program. The Navy began receiving WGU-4E/B GCSs in fourth quarter FY94 and had AIM-9M-8 All Up Rounds (AUR) available for issue by second quarter FY95.

**4. Significant Interfaces.** N/A

**H. NEW FEATURES, CONFIGURATION, OR MATERIAL.** The AIM-9M-8 features improved tracking capabilities against modern IRCM and provides new missile status tones (audio cues) to the operator (pilot).

**I. CONCEPTS**

**1. Maintenance Concept.** The AIM-9 maintenance objective is to assure that AURs are available to fulfill commitments of operational activities, and to provide the means to restore unserviceable missiles to serviceable condition with minimal downtime. Maintenance functions are allocated to three levels of maintenance as defined in the Naval Airborne Weapons Maintenance Program (NAWMP), OPNAVINST 8600.2(Series) Volume II.

**a. Organizational Level Maintenance.** Organizational level maintenance, performed at the squadron, is limited to visual inspections, launcher functional checks, replacement of launcher nitrogen receiver assemblies, loading and downloading of the missile, installation and removal of accessory items such as safety and protection devices, performance of the IR source test and tracking and recording of captive flight time. Missiles requiring maintenance are returned to the intermediate level maintenance activity for maintenance or disposition.

**b. Intermediate Level Maintenance.** Intermediate level maintenance, performed at the Aviation Intermediate Maintenance Department (AIMD), by Naval Airborne Weapons Maintenance Units (NAWMUs), and by Marine Aviation Logistics Squadrons (MALS) is limited to packing and unpacking inspections, cleaning, paint touch-up, preservation, removal and installation of wings and fins, replacement of specified parts, and servicing of the nitrogen receiver. Tactical missiles and training components which are Beyond the Capability of Maintenance (BCM) of the intermediate level are returned to AUR depot level maintenance for repair or disposition.

**c. AUR Depot Level Maintenance.** AUR depot level maintenance, performed at Naval Weapons Stations (NWS) Fallbrook and Yorktown and by NAWMU-1, is intended to provide repair capability for missile components BCM at the intermediate level. Maintenance includes AUR packing and unpacking, AUR assembly and disassembly, missile processing, wings and fins maintenance, S-A device maintenance and Sidewinder container maintenance.

**d. Section/Component Maintenance.** The Sidewinder program has implemented depot level repair capabilities at appropriate Designated Repair Points (DRP) within the joint services' missile maintenance activities. This approach takes full advantage of existing capabilities. The Navy DRP function for the Sidewinder GCS is Letterkenny Army Depot. The Naval Surface Warfare Center Indian Head (NSWC-IH) provides DRP functions for the propulsion

section. Naval Weapon Stations (NWS) Fallbrook and Yorktown are the DRPs for the mechanical items such as wings, fins, and containers. Naval Weapons Support Center (NAVWPNSUPPCEN) Crane is the DRP for the Target Detector and the S-A device.

**e. Technical Assistance.** Naval Air Warfare Center Weapons Division (NAWCWD) Engineering and Technical Services (ETS) personnel will provide AIM-9M-8 technical assistance as required to organizational and intermediate activities. NAWCWD ETS personnel will also provide On-the-Job Training (OJT) for organizational level and intermediate level maintenance personnel. Operational updates and briefings for flight crews are provided by Naval Strike Air Warfare Center (NSAWC) TOPGUN personnel.

**f. Interim Depot Maintenance Support.** Commercial Repair Basic Ordering Agreements with Raytheon and Loral are being prepared to augment AIM-9M-8 GCS repair workload until Letterkenny Army Depot attains the capability to handle the aggregate United States Navy (USN), USAF, FMS AIM-9M-8 GCS repair workload. It is estimated that the interim commercial repair support will not be needed after FY97.

**2. Operational Concept.** The AIM-9M-8 is designed to be deployed with Navy and Marine Corps tactical aircraft. The AIM-9M-8 is intended for use by F-14, F/A-18, and AV-8B aircraft. The missile is also compatible with the AH-1 aircraft. The Sidewinder Missile is used during air-to-air combat evolutions. The missile is launched from an aircraft after target detection to home-in, intercept, and destroy enemy aircraft.

**3. Manning Concept.** The AIM-9M-8 Sidewinder Missile will not alter the manning requirements at organizational, intermediate, or depot level maintenance activities. Manning requirements are based on total workload requirements for a specific work center, and the skills needed to perform maintenance on the systems supported by that work center's personnel. The retrofit of the AIM-9M-8 GCS will not alter the workload of activities involved with the Sidewinder Missile. Existing skills are adequate to maintain the AIM-9M-8. No new Navy Enlisted Classification (NEC) or Military Occupational Specialty (MOS) will be required.

**J. LOGISTICS**

**1. Manufacturer/Contract Number.** Seven procurable components comprise the Sidewinder Missile as shown in Table I-1:

PART	MANUFACTURER	CONTRACT NUMBER
Guidance Control Section	Raytheon	N00019-93-C-0169
	Loral	N00019-94-C-0138
Target Detector	Raytheon	N00019-90-C-0243
Safety-Arming Device	Piqua	N00019-90-C-0235
	Raymond	N00019-94-C-0271

Warhead Section	Ensign Bickford	N00019-95-C-0084
Propulsion Section	Thiokol	N00019-94-C-0045
Wings	DRI	N00019-94-C-0031
Fins	Lockley	N00019-95-C-0188

**Table I-1. Sidewinder Component Manufacturers.**

**2. Integrated Logistics Support Plan (ILSP) Development.** The Sidewinder ILSP (ILSP-MS-059), dated 15 December 1993 has been updated to include AIM-9M-8 information.

**3. Technical Data Plan.** Existing AIM-9 publications have been updated to include AIM-9M requirements. Because of the similarity between the AIM-9M and the AIM-9M-8, data pertaining to the AIM-9M-8 will be incorporated into the existing manuals. Source data was acquired from NAWCWD. A complete list of all publications requiring update can be found in the Technical Manual List NA 01-AIM9-0.

**4. Special Test Sets, Tools, and Test Equipment.** The introduction of the AIM-9M-8 to Navy and Marine Corps operational units and activities will not require any new test sets, tools, or test equipment. The existing AN/DSM-152A Test Set received software modifications enabling it to recognize the AIM-9M-8 configuration. The modified test set is designated the AN/DSM-152B.

**5. Repair Parts.** Supply support for the AIM-9M is provided by the Naval Ordnance Center Inventory Management and Systems Division (NOC IMSD), Mechanicsburg, PA. This network will be used to procure all AIM-9M-8 missile components that are common to earlier versions of the AIM-9M missile.

**6. Contractor Engineering and Technical Services (CETS).** N/A.

**K. SCHEDULES**

**1. Schedule of Events.**

**a. Installation Schedule.** As of the end of FY96, Raytheon has delivered approximately 2,330 AIM-9M-8/9 GCSs on the Basic and Option 1 contracts. Another 200 are expected in the first quarter of FY97 to complete the Option 1 contract. The Option 2 contract was never awarded, however, the Option 3 contract will begin GCS deliveries in the third quarter of FY97. A total of 1,200 AIM-9M-8/9 GCSs will be delivered through the second quarter of FY98 to complete the Option 3 contract. A new contract was awarded to Raytheon at the end of FY96 and deliveries against this new contract will begin following the Option 3 deliveries. Once GCSs are received by the Navy at NWSs Yorktown and Fallbrook, they must be tested and assembled with other AIM-9M components into AUR missiles prior to issue for fleet use.

**b. Ready for Operational Use (RFOU).** AIM-9M-8 was deployed to operational units in the third quarter of FY95.

**c. Foreign Military Sales.** To be determined (TBD). For further information contact PMA259.

**d. Training Device (TD) and Technical Training Equipment (TTE)**  
**Delivery Schedule.**

(1) **Classroom Explosive Ordnance Disposal (EOD) System Trainer (CEST).** CEST versions of the Sidewinder are currently used by Navy School EOD (NAVSCOLEOD) as training devices. A CEST peculiar to the AIM-9M-8 is not required.

(2) **Practical EOD System Trainer (PEST).** PEST versions of the Sidewinder are used by NAVSCOLEOD for training render safe procedures. A PEST peculiar to the AIM-9M-8 is not required.

(3) **Special Air Training Missiles (NATM).** Some AIM-9M-8 will be configured to the NATM configuration when ordered from the supply system. A firing version of the Sidewinder tactical missile with the warhead replaced by telemetry section. The NATM is used for test, evaluation, and specialized aircrew tactical training on instrumented firing ranges. Telemetered data is analyzed to determine captive flight target acquisition and tracking, missile launch, and target intercept missile performance characteristics.

(4) **Captive Air Training Missile (CATM).** Approximately 835 CATM-9Ms in various configurations currently exist. Components for another 400 CATM-9Ms have been procured. As the Navy receives WGU-4E/B GCSs, some of the CATM-9Ms will be retrofitted with this GCS and be designated CATM-9M-12s. Approximately 350 CATM-9M-12 will be built-up by December 1996. The Navy will maintain a total inventory mix of approximately 982 CATM-9Ms, which will be proportionate to the tactical inventory mix. See section IV.A.5.(a).

(5) **Dummy Air Training Missile (DATM).** Existing DATM-9M-1 and DATM-9M-2 will be used to support the training of USN and United States Marine Corps (USMC) ground maintenance technicians in assembly, disassembly, loading, transportation, and stowage procedures and techniques for the Sidewinder AIM-9M and AIM-9M-8. These DATMs are currently on-hand at AIM-9 training activities and are not certified for flight. See section IV.A.5.(b).

**2. Time Required to Install. N/A.**

**L. MANPOWER REQUIREMENTS**

**1. Equipment, Systems, and Subsystems. N/A.**

**2. Aircraft Equipment, Systems, and Subsystems.**

a. **Aircrew Requirements.** The AIM-9M-8 does not impact aircrew manpower.

b. **Estimated Direct Maintenance Man-Hours per Flight Hour (DMMH/FH).** N/A.

c. **Proposed Utilization.** The AIM-9M-8 missile is compatible with many aircraft. Utilization rates for those aircraft will not change as a result of the AIM-9M-8. Aircraft utilization rates may be found in the aircraft's Weapons System Planning Document.

**d. Recommended Quantitative/Qualitative Manpower Requirements.**

**(1) Manpower Requirements, Fleet Squadrons.** Manning for Navy and Marine Corps fleet squadrons is based on the total assigned workload in each work center. Ordnance support in the Armament/Weapons Branch (Work Center 230) is provided by Aviation Ordnancemen (AO). Like the AIM-9M Sidewinder Missile, the AIM-9M-8 is designed and employed as an AUR missile. Because of identical maintenance tasks between the different models, the AIM-9M-8 Sidewinder will not impact the work center's workload. There are no changes to existing fleet squadron manpower.

**(2) Manpower Requirements, Fleet Readiness Squadron (FRS).** FRS manning levels, like the fleet squadron, are based on the total assigned workload. No change to current FRS workload in the Armament/Weapons Branch (Work Center 230) will result from the AIM-9M-8. Existing FRS manpower will not change.

**(3) Intermediate Level Maintenance (CV/CVN, NAS, MALS, NAWMUS, and "L" Class Ships).** Weapons Departments and Divisions manning levels aboard these commands are based on total assigned workload. The AIM-9M-8 Sidewinder Missile will not impact the workload at these activities. No change in the existing manpower requirements will result from the AIM-9M-8.

**(4) AUR Depot Maintenance (NWSs Fallbrook and Yorktown and NAWMU-1).** The AIM-9M-8 Sidewinder Missile will not alter the workload at these activities after the initial retrofit is performed. Workload increase for the AIM-9M-8 version will be offset by a corresponding decrease in workload to existing AIM-9M missiles.

**M. TRAINING CONCEPT**

**1. Training Applicable to Military, Civilian, and Foreign Personnel.**

**a. Initial Training.** Initial training is funded by the TSA until the TA has attained the capability to conduct follow-on training. NAWCWD and TOPGUN developed Aircrew Familiarization packages for AIM-9M-8 initial training. The packages include a briefing and a classified indoctrination video. Video tapes were distributed separately by the Joint Visual Information Activity in Tobyhanna, Pennsylvania. VX-9 and TOPGUN personnel began initial aircrew training in September 1994. NAWCWD has revised the AN/DSM-152 Test Set Operator Course (CIN N-100-0483) to include AN/DSM-152B maintenance procedures. NAWCWD personnel provided initial training packages to NWS Yorktown, NWS Fallbrook and NAWMU-1 Guam.

**(1) Operator.** VX-9 and TOPGUN began AIM-9M-8 initial training presentations in fourth quarter FY94.

**(2) Maintenance.**

- (a) Organizational.** N/A.
- (b) Intermediate.** N/A.
- (c) Depot.**

1 AN/DSM-152B Test Set Operation and Maintenance

Course Number.....	N-100-0483
Course Length.....	4 days
RFT Date.....	Apr 96
Location.....	NWS Yorktown, NWS Fallbrook, NAWMU-1
TD/TTE.....	AN/DSM-152B
Note.....	Request from NAVAIRSYSCOM PMA205- 5C

(3) Team. N/A.

(4) Officer. Discussed under paragraph I.M.1.a.(1).

(5) Industrial Personnel. N/A.

b. Follow-On Training. Training on the existing Sidewinder AIM-9M Missile is in place. Operator (aircrew) training courses are being updated to include AIM-9M-8 Sidewinder information. Organizational level maintenance and intermediate level maintenance training courses required minimal updating to include the AIM-9M-8 nomenclature.

(1) Operator. Aircrew training courses are being modified to include AIM-9M-8 data. Modifications do not change course length. Operators will utilize a video tape to learn tone differences created by the AIM-9M-8 configuration. Also, interactive courseware (ICW) for the Strike Fighter Training Systems (SFTS) will be distributed in March 1997. OJT for operators is accomplished by using the Sidewinder CATM-9 series training missile.

(a) CATM-9M. Captive Air Training Missiles (CATM)-9M are captive carry missiles and are used for pilot training in aerial target acquisition and use of aircraft controls and displays. CATM-9M may consist of a combination of tactical and training (inert) components or all training components. See Table I-2 for further CATM-9M configuration details.

(b) Strike Fighter Weapons and Tactics (SFWT) Curricula. NSAWC TOPGUN, in conjunction with the various Weapons Schools, is developing post-Fleet Replacement Squadron (FRS) training at the squadron level. The Strike Fighter Weapons and Tactics (SFWT) curricula will be taught by each squadron's Strike Fighter Tactics Instructor (SFTI). The SFTI will be supported by SFTS, a multimedia computer-based training system that will host ICW. TOPGUN and NAVAIRSYSCOM PMA205-5 are developing AIM-9M-8 Aircrew ICW that is anticipated to be ready for training by the second quarter FY97.

1 Sidewinder AIM-9M-8 Aircrew ICW.

Course number.....	TBD
Course length.....	TBD
RFT date.....	Mar 97
Location.....	Fleet squadrons as deemed appropriate by TOPGUN and associated Weapons Schools
Source rating.....	None
Skill identifier..	Various aircrew AQDs

Table I-2. SIDEWINDER CATM-9M INFORMATION

- (c) **F-18 Aircraft.** The following list of courses have AIM-9M-8 source material incorporated, which caused no change in student throughput or chargeable student billets. These courses are listed for reference only and will not appear in Parts II and III of this document. See NTP A-50-7703 for course details.

1 F/A-18 Fleet Replacement Pilot Category (Cat) I

Course number..... D/E-2A-0601  
RFT date..... November 94

2 F/A-18 Fleet Replacement Pilot Cat IIA

Course number..... D/E-2A-0602  
RFT date..... November 94

3 F/A-18 Fleet Replacement Pilot Cat IIH

Course number..... D/E-2A-0603  
RFT date..... November 94

4 F/A-18 Fleet Replacement Pilot Cat IIF

Course number..... D/E-2A-0605  
RFT date..... November 94

5 F/A-18 Fleet Replacement Pilot Cat III

Course number..... D/E-2A-0604  
RFT date..... November 94

6 F/A-18 Fleet Replacement Pilot Cat IV

Course number..... D/E-2A-0606  
RFT date..... November 94

7 F/A-18 Fleet Replacement Pilot Basic and Transition

Course number..... M13P4B3  
RFT date..... November 94

8 F/A-18 Fleet Replacement Pilot Refresher

Course number..... M13P3V3  
RFT date..... November 94

9 F/A-18 Fleet Replacement Pilot Modified Refresher

Course number..... M13P3W3  
RFT date..... November 94

10 F/A-18 Weapon Sensor Operator (WSO) Basic and Transition

Course number..... M13P4C3  
RFT date..... November 94

11 F/A-18 WSO Refresher

Course number..... M13P3R3  
RFT date..... November 94

12 F/A-18 WSO Modified Refresher

Course number..... M13P3S3  
RFT date..... November 94

- (d) **F-14 Aircraft.** The following list of courses have AIM-9M-8 source material incorporated, which caused no change in student throughput or chargeable student billets. These courses are listed for reference only and will not appear in Parts II and III of this document. See NTP A-50-8511 for course details.

1 F-14 Fleet Replacement Pilot Cat I

Course number..... D-2A-1601  
RFT date..... November 94

2 F-14 Fleet Replacement Pilot Cat II

Course number..... D-2A-1602  
RFT date..... November 94

3 F-14 Fleet Replacement Pilot Cat III

Course number..... D-2A-1603  
RFT date..... November 94

4 F-14 Fleet Replacement Pilot Cat IV

Course number..... D-2A-1604  
RFT date..... November 94

5 F-14 Fleet Replacement Pilot Cat V

Course number..... D-2A-1605  
RFT date..... November 94

6 F-14 Naval Flight Officer (NFO) Cat I

Course number..... D-2D-1601  
RFT date..... November 94

7 F-14 NFO Cat II

Course number..... D-2D-1602  
RFT date..... November 94

8 F-14 NFO Cat III

Course number..... D-2D-1603  
RFT date..... November 94

9 F-14 NFO Cat IV

Course number..... D-2D-1604  
RFT date..... November 94

10 F-14 NFO Cat V

Course number..... D-2D-1605  
RFT date..... November 94

- (e) **AV-8B Aircraft**. The following list of courses have AIM-9M-8 source material incorporated, which caused no change in student throughput or chargeable student billets. These courses are listed for reference only and will not appear in Parts II and III of this document. See NTP A-50-8210 for course details.

1 AV-8B Fleet Replacement Pilot Basic and Transition

Course number..... M04P4H4  
RFT date..... November 94

2 AV-8B Fleet Replacement Pilot Refresher

Course number..... M04P4Q4  
RFT date..... November 94

3 AV-8B Fleet Replacement Pilot Modified Refresher

Course number..... M04P4R4  
RFT date..... November 94

- (f) **AH-1 Aircraft**. The following list of courses have AIM-9M-8 source material incorporated, which caused no change in student throughput or chargeable student billets. These courses are listed for reference only and will not appear in Parts II and III of this document. See NTP A-50-8520 for course details.

1 AH-1 Fleet Replacement Pilot Basic and Transition

Course number..... M23P4N1  
RFT date..... November 94

2 AH-1 Fleet Replacement Pilot Refresher

Course number..... M23P3M1  
RFT date..... November 94

3 AH-1 Fleet Replacement Pilot Modified Refresher

Course number..... M23P3X1  
RFT date..... November 94

**(2) Maintenance.**

**(a) DATM-9M.** Dummy Air Training Missiles (DATM)-9M are used to train organizational and intermediate level maintenance personnel in AIM-9M assembly, disassembly, loading, transportation, and stowage procedures and techniques. All components are training items (completely inert) except for wings, fins, and tactical umbilical cable. The DATM-9M-1 and DATM-9M-2 simulate both the AIM-9L and AIM-9M tactical missiles for training purposes and are not certified for flight.

**(b) Initial Skill Training.** The modification of the AIM-9M to the AIM-9M-8 configuration did not affect the training course content or course length at the AO A1 school, and therefor there were no changes in student throughput or chargeable student billets. These courses are listed for reference only and will not appear in Parts II and III of this document.

**1 Aviation Ordnance "Class A1" School (Core)**

Course number..... C-646-2011  
RFT date..... On line

**2 Aviation Ordnance "Class A1" School (Airwing Strand)**

Course number..... C-646-2012  
RFT date..... On line

**3 Aviation Ordnance "Class A1" School (Ship/Shore Strand)**

Course number..... C-646-2013  
RFT date..... On line

**(c) Organizational.** The modification of the AIM-9M to the AIM-9M-8 configuration did not affect the maintenance, release and control checks, or conventional weapons loading at organizational-level maintenance activities. Associated training course content and course lengths were not affected, and therefor there were no changes in student throughput or chargeable student billets. These courses are listed for reference only and will not appear in Parts II and III of this document. See NTPs A-50-7703, A-50-8511, A-50-8210, and A-50-8520 for course details.

**1 AV-8B Conventional Weapons Loading**

Course number..... C-646-3893  
RFT date..... On line

2 AV-8B Aircraft Ordnance Technician Integrated  
Organizational Maintenance

Course number..... C-646-9888  
RFT date..... On line

3 F-14 Conventional Weapons Loading

Course number..... D-646-1642  
RFT date..... On line

4 F-14A/B Armament Systems Organizational Maintenance  
(Initial)

Course number..... D-646-9962  
RFT date..... On line

5 F-14A/B Armament Systems Organizational Maintenance  
(Career)

Course number..... D-646-9963  
RFT date..... On line

6 F-14D Armament Systems Organizational Maintenance  
("D" Difference Training)

Course number..... D-646-9906  
RFT date..... On line

7 F/A-18 Conventional Weapons Loading

Course number..... D/E-646-0640  
RFT date..... On line

8 F/A-18 Conventional Release Systems Test

Course number..... D/E-646-0647  
RFT date..... On line

9 F/A-18 Stores Management Integrated Organizational  
Maintenance (Initial)

Course number..... C-646-9973  
RFT date..... On line

10 F/A-18 Stores Management Integrated Organizational  
Maintenance (Initial)

Course number..... C-646-9974  
RFT date..... On line

11 H-1 Armament Repair Integrated Organizational Maintenance

Course number..... C-646-9361  
RFT date..... On line

(d) Intermediate. The modification of the AIM-9M to the AIM-9M-8 configuration did not affect the intermediate-level maintenance of the AIM-9 missile, therefore training course content and course lengths were not impacted. The AIM-9 Sidewinder is taught in the following intermediate-level maintenance training courses.

1 Air Launched Guided Missiles Intermediate Maintenance.

Course number .... C-122-3111  
Course length .... 11 days  
RFT date ..... Nov 94  
Locations ..... NAMTG Mayport, FL, MTU 4030  
NAMTG Norfolk, VA, MTU 4032  
NAMTG North Is, CA, MTU 4033  
Source rating .... AO  
TD/TTE ..... See Part IV  
Skill identifier . NEC 6801 upon completion of track  
Prerequisites .... AO A1 or equivalent

2 Strike Armament Intermediate Maintenance Repair.

Course number..... C-646-3118  
Course length..... 61 days  
RFT date..... Nov 94  
Location..... NAMTG Mayport, FL, MTU 4030  
NAMTG North Is, CA MTU 4033  
Source rating..... AO  
Skill identifier.. NEC 6802 upon completion of track  
TD/TTE..... See Part IV  
Prerequisites..... AO A1 or equivalent

3 Aviation Ordnance Intermediate Maintenance Technician.

Course number .... C-646-3105  
Course length .... 95 days  
RFT date ..... Oct 96  
Locations ..... VMAT-203 FREST, MCAS Cherry Point, NC  
Source rating .... AO  
Skill identifier.. MOS 6541 upon completion of track  
TD/TTE ..... See Part IV  
Prerequisite ..... MOS 6511  
Note ..... Part of M-646-7023 track, replaces C-646-3126 and C-646-4107

4 Weapons Department General Aviation Ordnance Supervisor.

Course number .... C-646-4108  
Course length .... 19 days  
RFT date ..... Oct 95

Location ..... NAMTG Mayport, FL, MTU 4030  
NAMTG Norfolk, VA, MTU 4032  
NAMTG North Is, CA, MTU 4033  
Source rating .... AO  
TD/TTE ..... See Part IV  
Skill identifier . None  
Prerequisites .... AO A1 or equivalent

**5 Weapons Department General Aviation Ordnance.**

Course number..... C-646-4109  
Course length..... 19 days  
RFT date..... Oct 95  
Location..... NAMTG Mayport, FL, MTU 4030  
NAMTG Norfolk, VA, MTU 4032  
NAMTG North Is, CA, MTU 4033  
Source rating..... AO  
Skill identifier.. None  
TD/TTE..... See Part IV  
Prerequisites..... AO A1 or equivalent  
Confidential clearance

**(e) Depot.**

**1 AN/DSM-152B Test Set Operation and Maintenance**

Course Number..... N-100-0483  
Course Length..... 4 days  
RFT Date..... Apr 96  
Location..... NWS Yorktown, NWS Fallbrook, NAWMU-1  
TD/TTE..... AN/DSM-152B  
Note..... Request from NAVAIRSYSCOM PMA205-5C

**(3) Team/Proficiency. N/A.**

**(4) Officer.** Aircrew follow-on training courses for aircraft utilizing the AIM-9 Sidewinder Missile will be modified to reflect the AIM-9M-8 data. Refer to paragraph I.M.1.b.(1) for affected courses.

**(5) Industrial Personnel. N/A.**

**2. New Training Pipelines or Tracks. N/A**

**3. Explosive Ordnance Disposal Training.** The EOD Phase II Navy course will be modified to include AIM-9M-8 information. The modification will not affect course length.

**a. Explosive Ordnance Disposal Phase II Navy.**

Course number ... A-431-0011  
Course length ... 77 days  
RFT date ..... Nov 94  
Location ..... NAVSCOLEOD, NSWC-IH  
Source rating ... General (Enlisted and Officer)  
Skill identifier. NEC 5332, NOBC 9230  
TD/TTE ..... See Part IV  
Prerequisites ... Comply with BUPERSMAN Article 1410380,

Course A-433-0022, Course A-431-0069.  
Secret clearance.

**b. Explosive Ordnance Disposal Phase II.**

Course number ... A-431-0012  
Course length ... 156 days  
RFT date .... Nov 94  
Location ..... NAVSCOLEOD, NSWC-IH  
Source rating ... General (Enlisted and Officer)  
Skill identifier. NEC 5332, NOBC 9230  
TD/TTE ..... See Part IV  
Prerequisites ... Comply with BUPERSMAN Article 1410380,  
Course A-433-0022, Course A-431-0069.  
Secret clearance.

**c. Navy Explosive Ordnance Team Readiness Improvement Training.**

Course number ... G-431-0001  
Course length ... 22-27 days  
RFT date .... Nov 94  
Location ..... EODTEU ONE, NAS Barbers Point, HI  
EODTEU TWO, Fort Story, VA  
Source rating ... General  
Skill identifier. NEC 5331  
TD/TTE ..... See Part IV  
Prerequisites ... Confidential clearance, Completed A-433-0022/23

**4. NEC Assignable to Selected Reserves (SELRES).** SELRES personnel will receive their AIM-9M-8 training in the same manner that they received predecessor Sidewinder system training.

**N. ON-BOARD TRAINING**

**1. Proficiency or Other Training Organic to New Development.** The Maintenance Training Improvement Program (MTIP) is used to establish an effective and efficient training system that is responsive to fleet training requirements.

**2. Operator/Maintenance Personnel Qualification Standards Requirements.** N/A.

**3. Maintenance Training Improvement Program (MTIP) Requirements.** The MTIP, established by OPNAVINST 4790.2 for aircraft programs, is used to establish an effective and efficient training system that is responsive to fleet training requirements. MTIP is a training management tool that, through diagnostic testing, identifies individual training deficiencies at the organizational and intermediate levels of maintenance. MTIP allows increased effectiveness in the application of training resources through identification of skill and knowledge deficiencies at the activity, work center, or individual technician level. Remedial training is concentrated where needed to correct identified skill and knowledge shortfalls. An MTIP for weapon programs is in development by NAMTRA.

**4. Other On-Board Training.** The Conventional Ordnance Handling Qualification and Certification Program requires all ordnance personnel to be

qualified and certified in accordance with OPNAVINST 8023.2 and MCO 8023.2 series instruction.

**O. LIST OF RELATED NAVY TRAINING PLANS AND APPLICABLE DOCUMENTS**

<u>DOCUMENT/ NTP/DOCUMENT TITLE</u>	<u>PDA NTP NUMBER</u>	<u>CODE</u>	<u>STATUS</u>
Navy and Air Force ILSP for Sidewinder AIM-9M Missile System	ILSP MS-059	AIR-4.1.1	Approved 12/93

## PART II - BILLET AND PERSONNEL REQUIREMENTS

The following elements are not affected by the AIM-9M-8 Sidewinder Missile System and, therefore, are not included in Part II of this NTP:

II.A. BILLET REQUIREMENTS

II.A.2.b. Military Billets per Fleet Operational Unit [Including Fleet Readiness Squadrons (FRS)] and/or Activity - Old

II.B. PERSONNEL REQUIREMENTS

II.B.3. Foreign, Other Service, and Non-Military Personnel Annual Training Input Requirement

NOTE 1: This section of the AIM-9M-8 Sidewinder Missile System NTP is a compilation of two intermediate level NEC's and two intermediate level MOS's with associated billets.

The addition of the AIM-9M-8 Sidewinder Missile System to the intermediate level workload is only a small percentage of the required workload for that MOS or NEC. The NEC/MOS is not dedicated to AIM-9M-8 Sidewinder Missile System and therefore the training requirements will remain the same.

NOTE 2: This section of the AIM-9M-8 Sidewinder Missile System NTP is presented by NEC and MOS for ease of understanding. It was developed to establish the total intermediate level maintenance requirements for the ordnance community. The requirements are to train ordnance personnel in the USN and USMC to receive an NEC or MOS to fill a billet.

---

<b>TOTAL QTY. REQ'D.:</b>			<b>848</b>	

**NOTE:** The CATM-9M requirements (A-50-8105B-001) listed represent a mix of CATM-9M configurations (see Table I-2). WGU-4E/B GCS are being procured through the AIM-9M-8 Retrofit Program. Approximately 510 CATM-9Ms have been retrofitted to the CATM-9M-12 configuration using the WGU-4E/B GCS. The 848 CATM-9Ms represent an 86% readiness objective of 982 total CATM-9Ms needed to support the maintenance pipeline.

**IV.A.5.(b) Training Device - Dummy Air Training Missile (DATM)**

**Description of Device:** DATMs will be used for hands-on training and practice for actual weapon capabilities.

PART V - MAJOR MILESTONES

<u>COG CODE</u>	<u>MANNING AND TRAINING MILESTONES</u>	<u>DATE</u>	<u>REMARKS</u>
PDA .....	Commence Analysis of Manpower Personnel and Training Requirements .....	May 86	Complete
PDA .....	Promulgate Draft NTP to ALCON for Review and Comment .....	Jan 87	Complete
PDA .....	Proposed NTP A-50-8105A Submitted to OPNAV .....	May 87	Complete
DCNO (MPT) .....	Approve and Promulgate NTP A-50-8105A .....	Sep 89	Complete
TSA .....	Factory Training & Curriculum Material Contract Awarded .....	N/A	Complete
TSA .....	Commence NTP A-50-8105A Update to A-50-8105B .....	May 93	Complete
OPTEVFOR .....	Commence AIM-9M-8 OPEVAL .....	May 93	Complete
PDA .....	AIM-9M-8 GCS Retrofit Kit Contract Awarded .....	FY 94	Complete
TSA .....	Curricula Materials Delivered .....	Jan 94	Complete
TSA .....	Commence AIM-9M-8 Initial Training .....	Sep 94	Complete
TA .....	Commence Follow-On/Replacement Training .....	Oct 95	Complete
PDA .....	Fleet Introduction .....	May 95	Complete
DCNO (MPT) .....	Promulgate Update NTP A-50-8105B.....	Nov 96
