

NAVY TRAINING SYSTEM PLAN
FOR THE
STRIKE FIGHTER TRAINING PROGRAM

N88 NTSP-A-50-9906/A

MAY 2002

STRIKE FIGHTER TRAINING PROGRAM

EXECUTIVE SUMMARY

The Strike Fighter Training Program (SFTP) is a training concept designed to provide the infrastructure and support systems necessary for standardized and enhanced training at the fleet aircrew level. The goal is to increase flight crew readiness and combat capabilities while achieving training economy and efficiency.

The Strike Fighter Training System (SFTS) is designed to provide Navy F-14 and Navy and Marine Corps F/A-18 Strike Fighter aircrews with a comprehensive, web-based training management tool. It is designed as a single source of Strike Fighter training information to deliver training (lectures, interactive courseware), provide access to Strike Fighter reference materials, allow interactive scheduling of squadron/unit events, generate reports of aircrew qualification standards and track aircrew certification and training via electronic training jackets. The SFTS is available to all Strike Fighter squadrons and weapons schools. SFTS is an Abbreviated Acquisition program, currently in the Production and Deployment phase of the Defense Acquisition System. Initial Operational Capability (IOC) was first quarter Fiscal Year (FY) 02 and ship installs will continue through FY03 based on availability.

The SFTP is the initial model for the Aircrew Combat Training Continuum (ACTC) and consists of three pillars.

- The Strike Fighter Tactics Instructor (SFTI) program provides a cadre of formally trained instructors tasked to implement and administer the SFTP at the squadron and Type Wing Weapons School (TWWS) levels.
- The Strike Fighter Weapons and Tactics (SFWT) program is a comprehensive Weapons and Tactics syllabus that provide a framework for unit level training and sets standards of tactical proficiency and combat readiness.
- The SFTS is a comprehensive web-based training management system with the architecture, equipment, and training tools required to provide real-time support to the SFTIs and fleet aircrew, whether ashore or afloat.

A Software Database Administrator position staffed by Contractor personnel located at Naval Strike and Air Warfare Center (NSAWC) will perform data and courseware entry and afloat support. SFTIs assigned to NSAWC will serving as Subject Matter Experts (SME) and will perform lecture and courseware review and integration functions.

Analysis and Technology, Inc. delivered the initial set of hardware (and the associated software) in third quarter FY98 to NSAWC, Strike Fighter Weapons School Pacific, Strike Fighter Weapons School Atlantic, and the Strike Weapons and Tactics School Atlantic. A follow-on contract to install SFTS servers on Aircraft Carriers and Aircraft Carriers, Nuclear (CV/CVN), upgrade existing hardware from server-based to web-based, install servers at selected

STRIKE FIGHTER TRAINING PROGRAM

Strike Fighter bases, and develop and implement a Training Management System (TMS) was awarded to Booz-Allen and Hamilton, Inc. (BAH) in February 1999. BAH will perform maintenance on the hardware during the warranty period. A third contract for development of the courseware that resides on the SFTS was awarded to Logistic Services International, Inc. (LSI) in February 1999.

The SFTP had no impact on existing manpower requirements for F-14 and F/A-18 fleet squadrons or TWWSs. Selected F-14 and F/A-18 aircrews are being trained as SFTIs, who in turn, administer the SFWT Program in fleet squadrons. Their primary responsibilities are internal, unit-level training and external standardization and evaluation. The goal is to provide one SFTI to each Fighter Attack Squadron (VFA) F/A-18A/C/E, two (one pilot, one Radar Intercept Officer (RIO)) to each Fighter Squadron (VF), and two (one pilot, one Weapons Sensor Officer (WSO)) to each VFA F/A-18F squadron. In most instances, prior to an SFTI serving as a squadron Training Officer, he or she will serve a shore tour assignment as an NSAWC instructor, TWWS instructor, Fleet Replacement Squadron (FRS) instructor or weapons test instructor. Each SFTI is assigned an Additional Qualification Designator (AQD) of DB1 upon completion of the SFTI course at NSAWC.

The Naval Research and Development Department of the Naval Air Systems Command was funded by the Chief of Naval Operations (N789), formerly N889, to produce an SFTS Interactive Courseware Style Guide and Power Point presentations. Executive Steering Committee (ESC) and Program Advisory Group (PAG) guidance is provided in the SFTP Joint Type Commander (TYCOM)/NSAWC Instruction 1525.1B. These guides provide initial training for the SFTS ESC and PAG. Analysis and Technology, Inc. conducted initial SFTS training in May and June 1998 for System Administrators at all Strike Fighter Weapons Schools to include Windows NT 4.0, Workstation 4.0, and Cheyenne Server back-up software. In addition to SFTS-related training, the Naval Strike and Air Warfare Center is responsible for follow-on training of SFTIs.

STRIKE FIGHTER TRAINING PROGRAM

PREFACE

This Approved Navy Training System Plan (NTSP) for the Strike Fighter Training Program (SFTP), hereafter referred to as SFTP, has been developed to update the SFTP Draft NTSP N88-NTSP-A-50-9906/D dated March 2001. This document has been developed in accordance with guidelines set in Office of Chief of Naval Operations (OPNAV) publication P-751-1-9-97. This document reflects current SFTP logistics support requirements for training activities that provide instruction on the maintenance and operational use of the SFTP and identifies training courses that are affected by the SFTP. Comments from three reviewing activities are also incorporated. These comments serve to clarify many points in the previous (Draft) version.

PART I - TECHNICAL PROGRAM DATA

A. NOMENCLATURE-TITLE-PROGRAM

1. **Nomenclature-Title-Acronyms.** Strike Fighter Training Program (SFTP)
2. **Program Element.** 07500N

B. SECURITY CLASSIFICATION

1. **System Characteristics** Unclassified
2. **Capabilities** Unclassified
3. **Functions**..... Unclassified

For information pertaining to all elements of program management contact the Developing Agency, Program Manager, Air (PMA) 205.

C. MANPOWER, PERSONNEL, AND TRAINING PRINCIPALS

- OPNAV Principal Official (OPO) Program Sponsor..... CNO (N789F)
- OPO Resource Sponsor CNO (N789F)
- Developing Agency..... NAVAIRSYSCOM (PMA205)
- Training AgencyCOMNAVAIRLANT
COMNAVAIRPAC
NSAWC
- Training Support Agency..... NAVAIRSYSCOM (PMA205)
- Manpower and Personnel Mission Sponsor CNO (N12)
NAVPERSCOM (PERS-433, PERS-4)
- Director of Naval Training CNO (N795)

D. SYSTEM DESCRIPTION

1. Operational Uses. The SFTP provides a comprehensive web-based training management tool designed to provide Strike Fighter aircrew with a single source of training information. SFTP is comprised of three components called “pillars”:

- Strike Fighter Tactics Instructor (SFTI)
- Strike Fighter Weapons and Tactics (SFWT) Syllabus
- Strike Fighter Training System (SFTS)

The goal of the SFTP is to increase aircrew readiness and combat capabilities while achieving training economies and efficiencies. Specifically, the SFTP develops weapons employment and tactics development skills among Navy F/A-18 and F-14 squadrons and Marine Aviation Weapons and Tactics Squadron (MAWTS) 1.

Prior to July 1995, a “training continuum” for F-14 and F/A-18 aircrew personnel did not exist, with formalized instruction residing at the Fleet Replacement Squadron (FRS), Strike U., and TOPGUN. Following FRS training, aircrew personnel received On-the-Job Training in their respective squadrons in order to fulfill the requisite training and readiness goals as directed by the Type Commanders (TYCOM). Instruction varied by individual units and lacked standardization. This, in turn, affected the aircrew’s ability to maintain proficiency and provided no means to adequately determine a unit’s true readiness level. Additionally, there was no mechanism in place to effectively distribute training materials, nor the ability to quickly update changes to weapons, sensors, and tactics employment doctrine.

In November 1995, a Mission Need Statement (MNS) for the Fleet Aircrew Training Support System was jointly endorsed by the Commander in Chief, United States Naval Forces, Europe (CINCUSNAVEUR); Commander in Chief, United States Pacific Fleet (CINCPACFLT); and Commander in Chief, United States Atlantic Fleet (CINCLANTFLT). From that document, the Aircrew Combat Training Continuum (ACTC) concept was established with the SFTP as the lead element. The SFTP includes:

- **Strike Fighter Tactics Instructors.** Fully qualified instructors who administer internal squadron training and external standardization.
- **Strike Fighter Weapons and Tactics Syllabus.** Structured academic, simulator, and flight syllabi that ensures aircrews are fully trained in critical combat skills and thus achieving the highest degree of readiness.
- **Strike Fighter Training System.** A comprehensive secure networked web-based training tool designed to provide Strike Fighter aircrews with a single source of training information to deliver training, provide access to Strike Fighter reference materials, allow interactive scheduling of squadron and unit events, generate aircrew qualification status reports, and track aircrew certification and training via Electronic Training Jackets (ETJ).

The ACTC and SFTP were approved by the Naval Aviation Training Strategic Advisory Group (NATSAG) and retained a “Number One Priority” status through Calendar Year 2000. Subsequently, the Strike Fighter Training System Team (SFTST) was established through the collaboration of CINCPACFLT, CINCLANTFLT, CINCUSNAVEUR, and Naval Strike and Air Warfare Center (NSAWC). It has since evolved into the SFTP Executive Steering Committee (ESC) and its subordinate structure, comprised of the Program Advisory Group (PAG) and component working groups. Principal members of the ESC are:

- Commander, NSAWC
- Commander Naval Air Force, United States Pacific Fleet (COMNAVAIRPAC)
- Commander Naval Air Force, United States Atlantic Fleet (COMNAVAIRLANT)
- Commander Naval Air Reserve Force (COMNAVAIRRESFOR)

Additional voting members of the ESC are:

- Commanders, East and West Coast Type Wing
- Commanding Officer, MAWTS 1
- Commanding Officer, Strike Fighter Weapons School, Pacific (SFWSP)
- Commanding Officer, Strike Fighter Weapons School, Atlantic (SFWSL)
- Commanding Officer, Strike Weapons and Tactics School, Atlantic (SWATSLANT)

Additionally, the ESC advisory members are N789F, PMA205, PMA241, and PMA265.

The SFTP ESC determines and communicates actual operational training system requirements to support fleet combat readiness. Additionally, the ESC identifies and plans for future training requirements, and generates standards for integration and interoperability of various training system components. This is all part of the post-FRS training continuum concept as envisioned in the original MNS and communicated through the ACTC program. The SFTP ESC/PAG process provides an annual review of the SFTP, including program recommendations to the Air Board, NATSAG, and NATSAG ESC. The Chief of Naval Operations (CNO) N789, CNO N795, TYCOMs, Naval Air Warfare Center Weapons Division (NAWCWD), NAWCTSD, PMA205, PMA241, and PMA265 are supporting members of the ESC/PAG. The supporting members provide funding, contractual, engineering, and strategic support for the F-14 and F/A-18 communities.

2. Foreign Military Sales. Not Applicable (NA)

E. DEVELOPMENTAL TEST AND OPERATIONAL TEST. From April to June 2000, Booz-Allen and Hamilton, Inc. (BAH) and the Space and Naval Warfare Systems Command (SPAWAR) performed Technical Evaluation (TECHEVAL) integrated testing of the Strike Fighter On Line (SFOL) software. BAH and SPAWAR performed Operational Evaluation (OPEVAL) of the SFTS hardware in July 2000.

F. AIRCRAFT AND/OR EQUIPMENT/SYSTEM/SUBSYSTEM REPLACED. NA

G. DESCRIPTION OF NEW DEVELOPMENT

1. Functional Description. As mentioned in the preceding section, the SFTP is comprised of three distinct components. Their specific functions and intents are:

a. Strike Fighter Tactics Instructor. The SFTI course objective is to graduate officers who are fully qualified to execute the Strike Fighter Weapons and Tactics (SFWT) program and provide internal training and external evaluation at the fleet squadron level. The SFTI course taught at TOPGUN includes flight instruction, command and control integration, strike planning, and academics. The course is nine weeks, is conducted three times annually, and produces one replacement SFTI to satisfy fleet requirements every 18 months. Fleet squadron SFTI manning requirements are as follows:

- F/A-18A/C/E Squadrons - one SFTI each
- F/A-18F Squadrons - two SFTIs each (one Pilot and one Weapons Sensor Officer (WSO))
- F-14 Squadrons - two SFTIs each (one Pilot and one Radar Intercept Officer (RIO))

NSAWC provides guidance regarding SFTI candidate prerequisites and implements and promulgates the SFTI course syllabus and class quota control. Type Wing Commanders promulgate and oversee the SFTI applicant selection process. NSAWC and Type Wing Commanders provide input to Navy Personnel Command (NAVPERSCOM) concerning SFTI career paths and distribution.

b. Strike Fighter Weapons and Tactics Syllabus. The SFWT is a comprehensive training, qualification, and certification syllabus that includes academics, simulators, flights, and external evaluations. The syllabus objective is to maximize tactical proficiency and increase combat effectiveness. A five-tiered (Levels I-V) approach in designation of aircrew will be employed. Level V is used to designate SFTI course graduates. Current SFWT designations include:

- Level I..... (FRS Complete)
- Level II..... (Combat Wingman)
- Level III (Combat Section Lead)
- Level IV (Combat Division Lead)
- Level V (SFTI Designation)

The SFWT syllabus and associated qualification and currency guidance will be promulgated via a joint Type Wing instruction. Aviation Type Commander/NSAWC function in an advisory role to ensure concurrence with Training and Readiness directives and the SFTI training syllabus.

c. Strike Fighter Training System. The SFTS is a critical element of the program as it encompasses the distribution network (hardware and software) for the Strike Fighter aircrews. SFTS includes the technology, materials, organizational structure, and inherent

processes that are integrated to provide effective program management and oversight. It enables courseware development processes, and produces a repository that delivers high quality training materials to fleet Aviators. Furthermore, it provides a tracking system that quickly, easily, and accurately manages Flight Crew SFWT status. Finally, it provides a web-based distributed network that allows classified connectivity between NSAWC, local weapon schools, CV/CVNs, and all VF and VFA squadrons.

(1) Strike Fighter Training System Hardware. SFTS servers, desktop computers, laptop computers and laptop web servers are composed of Commercial Off-The-Shelf (COTS) and Government Off-The-Shelf (GOTS) hardware and software. All COTS hardware and software meets or exceed the minimum requirement in accordance with the Navy's Information Technology for the 21st century (IT21) specifications and Navy Marine Corps Internet (NMCI) specifications (where operational) that support the delivery, training management, and administration requirements. IT21 specifications were implemented and approved by Department of the Navy Chief of Information Office. NMCI will periodically update the hardware, software, and networks to keep up with current technology.

All SFTS computers are fully accessible to the classified Local Area Network (LAN), and Secret Internet Protocol Router Network (SIPRNET) Wide Area Network (WAN). SFTS computers will be used by the Type Wing Weapons School (TWWS) and fleet aircrew to deliver training, deliver reference material, schedule squadron and unit events, generate reports of aircrew qualification status, and track aircrew certification and training via ETJs.

SFTS, as a web-based management tool, is designed to deliver training at NSAWC, TWWSs, and in F-14 and F/A-18 squadrons. Training materials include lectures (Computer Aided Instruction (CAI)), Interactive Courseware (ICW), and Tests. CAI is provided in two forms:

- Power Point, which can be downloaded to the desktop computer for modification
- Hyper-Text Markup Language (HTML), for review without modification

All training materials, including ICW and tests, can be used for self-paced learning or for group presentations.

(2) Training Management System. The Training Management System (TMS) portion of SFTS is called Strike Fighter On Line (SFOL), which will become Air Combat On Line (ACOL) in ACTC. SFOL is a web-based training and learning management portal that permits aircrew to access and manage training materials, courseware, and training records in a secure, on-line environment. A Relational Database Management System (RDBMS) supports SFTS, providing a variety of tools for aircrew and staffs to maintain and process training data to enhance community knowledge management and decision-making initiatives. Capabilities include:

- Facilitating training scheduling by automating training events. The Training Management System manages resource scheduling and resolves scheduling conflicts, and then generates schedules for training.

- Administering and tracking aircrew training. Provides a full spectrum management from ground-based training through the briefing for a training event, the event, and post-event debriefing process, including tools for reviewing aircrew progress and remediation.
- Will be able to assess training system effectiveness, and provide tools for measuring and reporting squadron readiness via Sierra Hotel Aviation Readiness Program (SHARP).
- Managing, measuring, and reporting all aircrew qualifications, proficiency, and currency, ensuring that access to squadron level data is controlled so that all data is available at the squadron level, but access by others is limited.

(a) Information Management System. The Information Management System's purpose is to:

- Disseminate data by generating aircrew qualification reports.
- Track aircrew certification and training.
- Provide access to reference materials. All technical, tactical, and operational publications that support the SFTS are stored in the SFTS database as well as aircrew data in the electronic training jackets.

(b) System Administration and Maintenance System. The System Administration and Maintenance System provides SFTIs and network administrators the ability to perform system administration at their activity to include:

- Controlling system access.
- Monitoring aircrew performance.
- Performing system operations tasks.
- Administering the SFTS, the SIPRNET WAN, and LAN.
- Ensuring system security.

2. Physical Description. The SFTS has a database, file, print, and communication server at NSAWC, SFWSP, SFWSL, SWATSLANT, and 12 CV or CVNs. All servers are in a secure location. Each server will have two sets of duplicate hardware that will meet the requirements of IT21 and NMCI specifications at the time of delivery. The hardware and software specifications listed below are:

NOMENCLATURE	DESKTOP WORKSTATION
Central Processing Unit (CPU)	Pentium III, 866MHz with 256K cache, 128MB/100MHz SDRAM, 10GB HD, 16X DVD ROM, 3.5" Floppy, 10/100 Network Card

NOMENCLATURE	DESKTOP WORKSTATION
Monitor	17" Color (16" Viewable)
Keyboard-Mouse	Standard
Software	Windows 2000, MS Office 2000 Professional, MS Exchange/ Outlook, Internet Explorer 5.0, Smart Card Support, NetMeeting 3.0, Norton A/V, Quicktime 4.1, Shockwave 8.0, Flash 4.0, Adobe Acrobat Viewer, WinZip

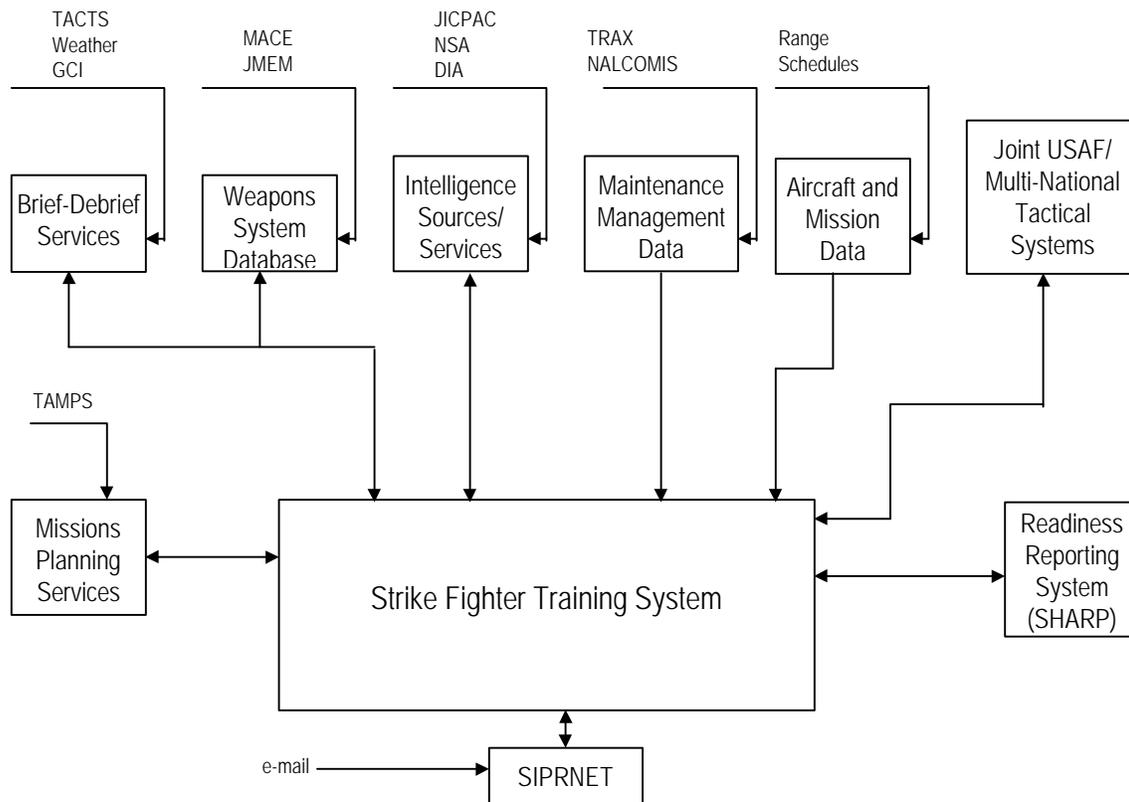

NOMENCLATURE	PORTABLE SEAT (LAPTOP)
CPU	Pentium III, 750MHz, 128MB/100MHz SDRAM, 6GB HD, 3.5" Floppy, 24X/10X Variable CD, 56K Modem, Integrated 3Com NIC, Battery, Case
Monitor	14.1" XGA Active X / 17" Color (16" Viewable)
Keyboard-Mouse	Standard
Software	Windows 2000, MS Office 2000 Professional, MS Exchange/ Outlook, Smart Card Support, NetMeeting 3.0, Norton A/V, Internet Explorer 5.0, Quicktime 4.1, Shockwave 8.0, Flash 4.0, Adobe Acrobat Viewer, WinZip

NOMENCLATURE	LAPTOP WEB SERVER
CPU	Pentium III, 700MHz, 256MB/100MHz SDRAM, 18GB HD, 3.5" Floppy, 40X CD, 56K Modem, Integrated 3Com 10/100 NIC, Battery, AC/DC Power Adapter
Monitor	14.1" XGA Active X Color
Keyboard-Mouse	Standard
Software	Windows NT 4.0 Server with SP 6A, MS Office 2000 Professional, Cold Fusion 4.0, Sybase ASA 6.0, Norton A/V, Internet Explorer 5.5, Quicktime 4.1, Shockwave 8.0, Flash 4.0, Adobe Acrobat Viewer, WinZip, Windows NT Option Pack, Unicenter TNG Framework

NOMENCLATURE	WEB SERVER
CPU	Dual Pentium III, 550MHz with 512K Cache, 256MB/100MHz SDRAM, 6-18.2GB and 2-9.1GB HDs, 40XCD, 3.5" Floppy, 10/100 Network Card; DLT Backup Tape Drive
Monitor	15" Color
Keyboard-Mouse	Standard
Software	Windows NT 4.0 Server with SP 6A, ArcServe for NT Working Group, Cold Fusion 4.0, PkWare, Sybase ASA 6.0, Norton A/V, Internet Explorer 5.0, Quicktime 4.1, Shockwave 8.0, Flash 4.0, Adobe Acrobat Viewer, WinZip, Windows NT Option Pack, Unicenter TNG Framework

3. New Development Introduction. The SFTP is a new program designed to standardize the current fleet training requirements and qualification standards at NSAWC, fleet squadrons, and the TWWSs. Introduction of SFTIs to the fleet began in third quarter Fiscal Year (FY) 95 and training of new SFTIs will continue indefinitely. Introduction of the simulator and flight portions of the SFWT syllabus began in fourth quarter FY95. The academic portion of the SFWT syllabus will be introduced to the fleet in second quarter FY02. The SFWT syllabus consist of level II, III, and IV simulator and flight events, and level II academics (ICW, CAI, and tests). Completion of the level II academics contract is expected sometime during the third quarter FY02. Revision and Upgrades to the first delivered syllabi will begin at that time. The first installation of SFTS equipment to NSAWC and the Strike Fighter Weapons Schools was completed by A&T in June 1998. The original server-based equipment was replaced with web-based equipment by BAH in March 1999. SIPERNET access has been installed at Naval Air Station (NAS) Oceana, Virginia, and NAS Fallon, Nevada, and is currently being installed at NAS Lemoore, California.

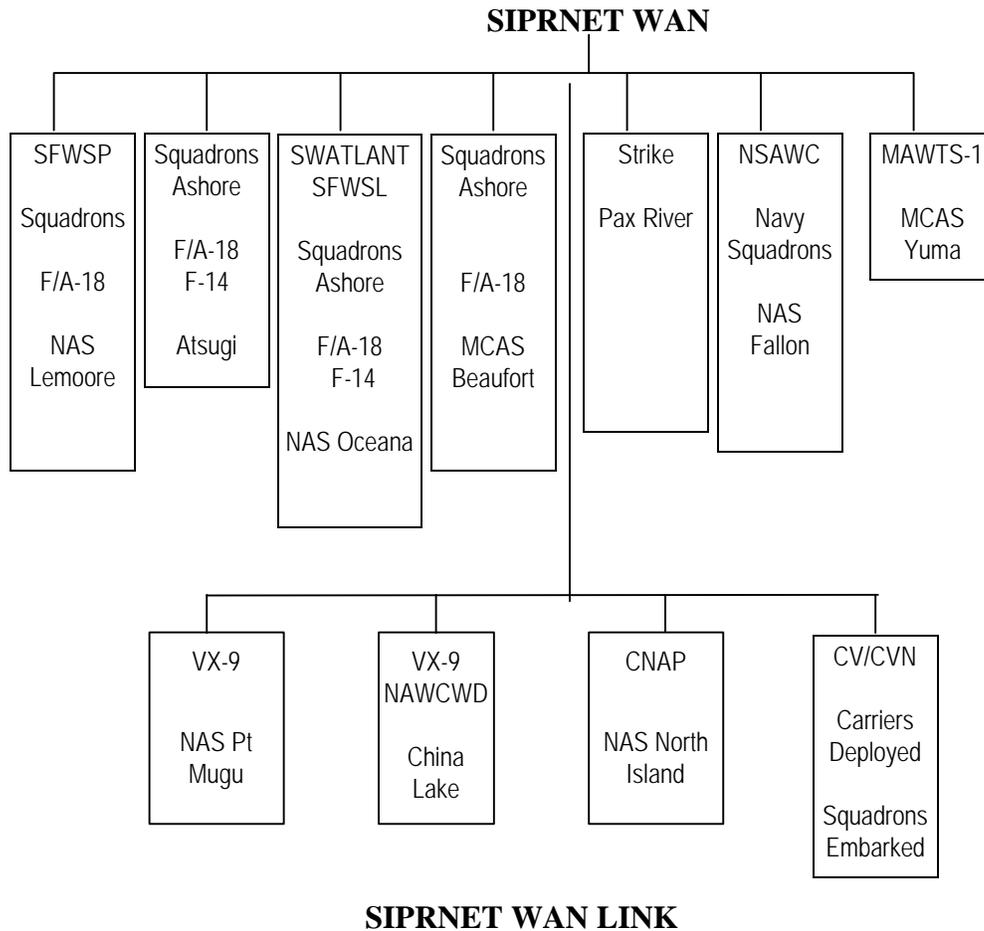

4. Significant Interfaces. The SFTP is a new program that introduces SFTS, which is a comprehensive, web-based training management tool designed to provide Strike Fighter aircrew with a single source of training information. SFTP will serve as the benchmark or prototype program for all other programs developed for the ACTC. SFTP requires SFTS compliance with internet protocols, Intelligence Services, Maintenance Management Data, Weapon System Databases, Brief-Debrief Services, Aircraft and Mission Planning Services, and Joint United States Air Force/Multi-National Tactical Systems through use of the LAN and SIPERNET WAN to reach full operating potential. This infrastructure is necessary if realistic F/A-18 and F-14 mission planning and training functions are to be achieved. The relationship of each interface to SFTS is illustrated below:

SFTS INTERFACE RELATIONSHIPS

a. Local Area Network. The SFTS LAN uses a network encryption device for secure and unsecure modes to protect from external sources and features IT21 high-speed fiber optics technology. A System LAN Administrator provided by NMCI, Government Service, Contractor, or Military Automated Information Specialist will be required at NSAWC, SFWSP, and SFWSL to maintain the government LAN.

b. Secret Internet Protocol Router Network Wide Area Network. The SIPERNET WAN will be used for secure modes to protect from external sources. SIPERNET WAN will link to NSAWC, F-14 and F/A-18 squadrons, Strike Fighter Weapons Schools, and CV/CVNs as illustrated below:

5. New Features, Configurations, or Material. NA

H. CONCEPTS

1. Operational Concept. Funding for the SFTP is provided by CNO N789 and managed by NAVAIRSYSCOM PMA205 during program development. In second quarter FY02, the TYCOMs and NSAWC will assume operation and support of the program.

The ESC is responsible for SFTP oversight, providing executive level management and requirements/policy decision making for major SFTP issues. The PAG advises the ESC in these matters. NSAWC and the TYCOMs provide daily oversight and execution of the SFTP.

The SFTIs at NSAWC, SFWSL, SFWSP, and fleet squadrons will have the ability to deliver training, schedule squadron and/or unit events, generate aircrew qualification reports, and track aircrew certification and training 24 hours a day, whether ashore or afloat.

2. Maintenance Concept

a. Organizational Maintenance. NMCI, command, or base Automated Information Specialist personnel will perform organizational level maintenance on SFTS hardware. Organizational level maintenance is defined as the removal and replacement of Lowest Replaceable Units (LRU) at the equipment level (i.e., CPU, monitor, keyboard, printer, etc.).

BAH will assist or will perform organizational level maintenance during the warranty period (approximately two years).

Government Service or contractor personnel will be located at all Strike Fighter locations to load courseware, assist SFTIs with account maintenance security, and monitor the overall status of the local server. The Software Database Administrator will monitor the overall status of all SFTS servers, including those afloat and at forward-deployed stations, and perform preventive and corrective maintenance. CVs and CVNs afloat will have an Information Technology Specialist (IT) that should be familiar with the SOP provided during the installation. Attention should be focused on familiarity with the database and replication configuration and routines. An adequately trained IT with experience or training in System Administration skills for NT, IIS, and database administration will be able to handle most if not all discrepancies with the SFTS server.

(1) Preventive Maintenance. Preventive maintenance actions will consist of scheduled system backups, periodic defragmentation of disk drives, and general cleaning.

(2) Corrective Maintenance. Corrective maintenance will consist of replacing failed LRUs and rebuilding corrupted files.

b. Intermediate. NA

c. Depot. Depot level repair of SFTS will be conducted by NMCI or Automated Information Specialist personnel.

d. Interim Maintenance. BAH will provide the interim maintenance for the SFTS hardware and associated SFOL during the warranty period (approximately two years), ending in fourth quarter FY02.

e. Life Cycle Maintenance Plan. Components will be repaired or replaced as they fail. Life cycle maintenance is not currently planned.

3. Manning Concept. The SFTP has no impact on existing manpower requirements for F-14 and F/A-18 communities. NSAWC, F-14 and F/A-18 squadrons, and Strike Fighter Weapons Schools have SFTIs for their activity. "DB1" is the Additional Qualification Designator (AQD) for an SFTI. The SFTIs will conduct training, schedule squadron and unit events, generate aircrew qualification status reports, and track aircrew certification and training. Additionally, SFTIs at NSAWC will continually monitor training materials for accuracy and currency.

NSAWC is responsible for training SFTIs. The following are requirements to attend the SFTI courses:

- Endorsement by Commanding Officer, Air Wing Commander, or Type Wing Commander with emphasis on leadership, tactical ability, aviation skills, and instructing capability.
- Selection by Type Wing selection board, which will convene prior to class convening dates.
- Acknowledging acceptance to the SFTI course requires a 24-month active duty sea duty obligation after completion of a shore duty assignment at NSAWC, TWWS, FRS, or Air Test Squadron and after completion of the SFTI course.

4. Training Concept. NSAWC provides follow-on training. SFTIs serve as the cornerstone of the SFWT program and are responsible for conducting training, generating aircrew qualification reports, and tracking aircrew certification and training at their sites. SFTIs develop and retain expert knowledge and core competencies and maintain program continuity. SFTIs at NSAWC and the Type Wings are Subject Matter Experts (SME), who are the hub for weapons and tactical information flow to and from fleet SFTIs.

The SFWT syllabus provides FRS, TWWS, and aircrews standardized, graduate level training and certification. The SFWT syllabus includes formalized academics, simulators, and flights. Simulator and flight events will be representative of those listed in the community Training and Readiness Matrix (T&RM), and are not additional events beyond those listed in the T&RM. The SFWT syllabus also has external standardization evaluation within a five-tiered approach.

- Level IFRS Complete
- Level IICombat Wingman
- Level IIICombat Section Lead
- Level IVCombat Division Lead
- Level VSFTI Designation

SFTIs will maintain training records for all aircrew members at their respective squadrons on SFTS. These records are kept as part of the SFOL database and will be used to track the following information:

- Qualification
- Academic Completions
- Open and Closed Book Examinations
- Trainer and Flight Event Grade Sheets
- Certifications
- Unsatisfactory Events
- External Standard Evaluations
- Level 2, 3, and 4 Wing Recommendations

- Individual and Unit Level Training Readiness

a. Initial Hardware Training. The Naval Research and Development (NRaD) Division of the Naval Command, Control and Oceanographic System Center (NCCOSC), was funded by PMA205 to produce an SFTS Courseware Style Guide. This action ensured the standardization of courseware during the development process. Analysis and Technology, Inc. provided initial server-based SFTS training for System Administrators at NSAWC and at all Strike Fighter Weapons Schools from May to June 1998. The initial training length varied, depending on the level of experience of the System Administrators and was recorded as follows: NSAWC (three days), SFWSP (one and a one half days), SFWSL (one and one half days), and SWATSLANT (ten days). BAH began initial web-server and TMS training at NSAWC during third quarter FY00.

b. Follow on Training. The SFTI course is an existing course with CNO approval. A Course Identification Number (CIN) does not apply.

(1) Operator

Title	TOPGUN Strike Fighter Tactics Instructor (Navy)
CIN	NA
Model Manager ..	NSAWC
Description	This course provides standardized training to Navy F-18A/C/E Pilots, F/A-18F Pilots and WSOs, and F-14 Pilots and Naval Flight Officers in the knowledge and skills required to perform as a SFTI in the fleet and at the Strike Fighter Weapons Schools.
Location	NSAWC, NAS Fallon
Length	68 days
Skill identifier	Designator 1310 or 1320
TTE/TD	Squadron supplied F-14 and F/A-18 aircraft as applicable
Prerequisites	Qualified F/A-18 Pilot/WSO or F-14 Pilot/RIO

c. Student Profiles

SKILL IDENTIFIER	PREREQUISITE SKILL AND KNOWLEDGE REQUIREMENTS
F-14 Pilot 1310	<ul style="list-style-type: none"> ◦ E-2D-0032, Survival, Evasion, Resistance, and Escape Training ◦ J-495-0413, Shipboard Aircraft Firefighting ◦ Q-2A-0010, Joint T-34C Intermediate Flight Training ◦ Q-2A-0001, Primary Flight Training ◦ Q-2A-0007, T45 Total System (TS) Strike Flight Training Curriculum ◦ Q-2A-0006, Advanced Strike ◦ D-2A-1601 F-14 Pilot Category 1
F/A-18A/C/E Pilot 1310	<ul style="list-style-type: none"> ◦ E-2D-0032, Survival, Evasion, Resistance, and Escape Training ◦ J-495-0413, Shipboard Aircraft Firefighting ◦ Q-2A-0010, Joint T-34C Intermediate Flight Training ◦ Q-2A-0001, Primary Flight Training ◦ Q-2A-0007, T45 Total System (TS) Strike Flight Training Curriculum ◦ Q-2A-0006, Advanced Strike ◦ D/E-2A-0610, F/A-18 Fleet Replacement Pilot Category 1 Pipeline
F-14 RIO 1320	<ul style="list-style-type: none"> ◦ E-2D-0032, Survival, Evasion, Resistance, and Escape Training ◦ J-495-0413, Shipboard Aircraft Firefighting ◦ Q-9B-0020, Preflight ◦ Q-2D-0012, Primary Student Naval Flight Officer and Navigator Training ◦ Q-2D-0027, Intermediate Student Naval Flight Officer/Navigator Training ◦ Q-2A-0006, Advanced Strike ◦ D-2D-1601, F-14 Naval Flight Officer Category 1

SKILL IDENTIFIER	PREREQUISITE SKILL AND KNOWLEDGE REQUIREMENTS

d. Pipeline Training. The F-14 and F/A-18 pipeline training tracks are not affected by this program.

I. ONBOARD (IN-SERVICE) TRAINING

1. Proficiency or Other Training Organic to the New Development. SFTS is an onboard proficiency Computer Web Based system that utilizes various interface services accessible at each workstation and available at each site. SFTIs will use the SFTS program at each site to manage the SFTP and ensure the development of highly trained aircrews.

a. Maintenance Training Improvement Program. NA

b. Aviation Maintenance In-Service Training. NA

2. Personnel Qualification Standards. NA

3. Other Onboard or In-Service Training Packages. NA

J. LOGISTICS SUPPORT

1. Manufacturer and Contract Numbers. Analysis and Technology, Inc. was contracted in 1998 to install, maintain, and provide initial training on the SFTS file-based servers at NSAWC, SFWSP, SFWSL, and SWATSLANT. In March 1999, Booz-Allen & Hamilton was awarded a contract to develop the SFTS TMS, procure and install web-servers at 14 shore sites and 12 CV/CVN sites, and provide initial training. In March 1999, Logistic Services International was awarded a contract to develop approximately 80 hours of ICW and 120 hours of CAI, which was based upon the SFWT Level II syllabi for F/A-18 and F-14 aircrews.

CONTRACT NUMBER	MANUFACTURER	ADDRESS
N66604-95-D-0047-0112	Analysis and Technology, Inc.	2650 Camino Del Rio North # 201 San Diego, CA 92108
N0001999RXBS88A	Booz-Allen & Hamilton, Inc.	1615 Murray Canyon Road Suite 800 San Diego, CA 92108
N0001999RXBS87A	Logistics Services International	6200 Lake Gray Boulevard Jacksonville, FL 32244-5896

2. Program Documentation. Program documentation includes:

- CINCUSNAVEUR, CINCPACFLT, and CINCLANTFLT Draft MNSs, November 1995
- Strike Fighter Training Program Technical Report, N00421-95-D-1001, approved September 1997
- Commander, Naval Air Force U.S. Pacific Fleet Functional Requirements Document (FRD) Version 2.0, April 1996
- Commander, Naval Air Force U.S. Pacific Fleet Project Implementation Plan (PIP) Draft Version 1.1, May 1996
- Joint COMNAVAIRPACINST/COMNAVAIRLANTINST1525.1B/COMNAVSTKAIRWARCENINST 1542.3B/COMNAVAIRESFORINST 1542.3B, 10 February 1998
- F-14 NTSP, N88-A-50-8511C/A, approved February 2002
- F/A-18 Draft NTSP, N88-NTSP-A-50-7703H/A, approved January 2002
- Strike Fighter Training System, Training Management System Functional Requirements Document (FRD), July 1999.

3. Technical Data Plan. F-14 and F/A-18 aircrew use the F-14 and F/A-18 Naval Air Training and Operating Procedures Standardization (NATOPS) manual they are issued and the instructions listed in element IV.B.3.

4. Test Sets, Tools, and Test Equipment. NA

5. Repair Parts. SFTS is composed of COTS hardware and software that support delivery, training management, and administration requirements. The maintenance and repair of the SFTS will be performed by BAH during the warranty period of one year, funded by PMA205.

After the expiration of the warranty period, maintenance and repair cost will be funded through the TYCOMs.

6. Human Systems Integration. NA

K. SCHEDULES

1. Installation and Delivery Schedules. Navy and Marine Corps commands listed below received hardware and software to support the SFTS. MAWTS 1 has the SFTS hardware and software at this time, but the Marine Corp is not involved in the SFTP. If this changes it will be included in updates to this document.

DELIVERY AND INSTALLATION SCHEDULE (HARDWARE AND SOFTWARE)

ACTIVITY	QUARTER:	FY99				FY00				FY01				FY02			
		1	2	3	4	1	2	3	4	1	2	3	4	1	2	3	4
NSAWC NAS Fallon									X								
SFWSL NAS Oceana, Attack Squadron (VA)										X							
SFWSP NAS Lemoore										X							
SWATSLANT NAS Oceana										X							
NAS Patuxent River (STRIKE)													X				
NAS North Island (CNAP)													X				
NAS Pt. Mugu (VX-9) (TBD)																	
NAWCWD China Lake														X			
MAWTS-1, Yuma												X					
Naval Air Facility (NAF) Atsugi, Japan										X							
CV 63 USS Kitty Hawk										X							
CV 64 USS Constellation										X							
CVN 65 USS Enterprise											X						
CV 67 USS John F. Kennedy													X				
CVN 68 USS Nimitz														X			
CVN 69 USS Dwight D. Eisenhower (TBD)																	

ACTIVITY	QUARTER:	FY99				FY00				FY01				FY02			
		1	2	3	4	1	2	3	4	1	2	3	4	1	2	3	4
CVN 70 USS Carl Vinson												X					
CVN 71 USS Theodore Roosevelt											X						
CVN 72 USS Abraham Lincoln													X				
CVN 73 USS George Washington														X			
CVN 74 USS John C. Stennis												X					
CVN 75 USS Harry S. Truman													X				
CVN 76 USS Ronald Reagan (TBD)																	

The courseware developed by Logistic Services International (LSI) is a mix of ICW and CAI. As each lesson is completed, it is delivered to NSAWC for review. Upon approval by PMA205 and NSAWC, each lesson is placed on the network and considered ready for training. The initial server file-based courseware development began in February 1999 with web-based courseware delivery completed by the end of first quarter FY02.

DELIVERY AND INSTALLATION SCHEDULE (COURSEWARE)

COURSEWARE	QUARTER:	FY99				FY00				FY01				FY02			
		1	2	3	4	1	2	3	4	1	2	3	4	1	2	3	4
Interactive Courseware				X	X	X	X	X	X	X	X	X	X	X			
Computer Aided Instruction				X	X	X	X	X	X	X	X	X	X	X			

2. Ready For Operational Use Schedule. Installation of hardware and software will be required at NSAWC, SFWSP, SFWSL, SWATSLANT, CVs, and CVNs. SFTS will be ready for operational use upon completion of installation.

3. Time Required to Install at Operational Sites. Hardware installation time varies, depending on currently existing hardware at each activity.

4. Foreign Military Sales and Other Source Delivery Schedule. NA

5. Training Device and Technical Training Equipment Delivery Schedule. Refer to Part IV, element IV.A.1 for applicable Technical Training Equipment (TTE). There are no Training Devices (TD) associated with SFTS.

L. GOVERNMENT FURNISHED EQUIPMENT AND CONTRACTOR FURNISHED EQUIPMENT TRAINING REQUIREMENTS. NA

PART II - BILLET AND PERSONNEL REQUIREMENTS

The following elements are not affected by the Strike Fighter Training Program and therefore, are not included in Part II of this NTSP.

II.A. Billet Requirements

II.A.2.a. Operational and Fleet Support Activity Deactivation Schedule

II.A.2.b. Billets to be Deleted in Operational and Fleet Support Activities

II.A.2.c. Total Billets to be Deleted in Operational and Fleet Support Activities

Note 1: The billets listed in Part II are from the Top Gun curriculum to show throughput for the SFTP. This is necessary to view impacted commands in Parts II and III of this NTSP. These are existing billets.
